

Fixed Cost IT Services: One monthly fee is all you pay!

Do you have trouble budgeting for IT from year to year? Has the loss of a critical applications ever affected your business revenue? Let us give you the peace of mind and the freedom to run your business without having to worry about unexpected IT issues.

Downtime and lost productivity impact your bottom line. Fixed cost IT provides a reliable way to manage your network for a budget-friendly, predictable cost. F8 Consulting will work with you to understand your business's needs and budget.

What do we offer?

F8 offers a full range of IT services, customized to your needs, at an affordable price. From day-to-day trouble-shooting to strategic long term planning, we have you all covered. We can be your IT department or supplement your existing IT staff. Just tell us what you need.

How do we do it?

First, we assess your existing infrastructure to assess potential weaknesses and meet with you to understand your concerns. Next, we create a custom service plan that defines your expectations and needs. Then, we deliver.

F8 consultants are veteran IT professionals with a minimum of five years of experience in their field. Each consultant has serviced a diverse range of clients, from small start-ups to large educational institutions, and is experienced in providing quality service in cost-conscious environments. We also employ state-of-the-art tools, such as automated systems reporting, to monitor the performance and health of your network. Essentially, we become your outsourced IT department with a local presence.

We can also provide:

VIRTUALIZATION

Cloud computing is an exciting new technology designed to dramatically reduce IT costs through server consolidation. Our experts design, build and manage virtual networks that will take your enterprise to the next level.

NETWORK DESIGN

Our Network Architects will design your network to meet your current and future needs, including cabling, connectivity and infrastructure, and can also continue on to ensure your network functions smoothly.

ENTERPRISE DATABASE REPORTING

Our Database Reporting Specialists create accurate, content-rich reports that help drive the key performance goals of your business.

DATABASE ADMINISTRATION AND DEVELOPMENT

We deliver high-quality SQL, Oracle and .Net database development, and provide comprehensive administration and migration services to ensure the consistency, reliability and security of your data.

HOSTED EXCHANGE

We can provide you with global shared contacts, calendars and instant access to your email through Microsoft's Exchange Hosted Solution without the hassle and expense of managing your own server. Spam and virus filtering is INCLUDED with this service.

WEB AND EMAIL HOSTING

Let us provide the dynamic design, development and hosting of your company website. We can also host your domain!

PROJECT MANAGEMENT

We can assist your in-house staff in managing a variety of projects from concept through timely completion, including network design, upgrades, proprietary HW and SW implementation, WAN/LAN and VPN integration.

RELOCATION CONSULTING

Moving? Consult our experts to ensure the most efficient relocation of your technology systems.

F8 MANAGED SERVICE PLANS

SERVICE	DESCRIPTION	MANAGED WORKSTATIONS	MANAGED SERVERS	MANAGED NETWORK
Online Backup	Your critical data is remotely and automatically backed up in SAS-70 compliant data centers to ensure it is protected and available for restoration. This removes the potential for “human error” that can lead to lost data or security breaches.		✓	✓
Help Desk	Our service desk acts on customer inquiries regarding the network components covered under your service contract during normal business hours.	✓	✓	✓
Monitoring	Our state of the art, remote-monitoring system lets us know about problems with your network environment to prevent them from affecting you.	✓	✓	✓
Maintenance	Preventative maintenance is the best way to decrease downtime and keep security tight.	✓	✓	✓
Management	Our management system allows our engineers to take control of network devices, perform remote maintenance and address problems as they arise.	✓	✓	✓
Security	We employ an array of sophisticated technologies and protocols to ensure immediate detection and to keep your digital assets protected against spyware, viruses and intruder vulnerabilities.	✓	✓	✓
Reporting	We generate customized quarterly reports on items that threaten the performance, security or integrity of your network environment to ensure you are aware of your network’s health.	✓	✓	✓
Wellness Visits	Unlike other providers, a network technician will make a monthly service visit to your location to ensure the health of your equipment and to personally listen to any and all of your concerns and issues.			✓
Project Management	Our dedicated “Virtual CIO” will act as the technical seat in your senior management team by visiting you to discuss issues based on the data collected from your environment and provide customized recommendations on how to plan for the future.			✓
