NONPROFIT DISCOUNT PROGRAM

You work to make the world a better place.
Let F8 Consulting help you work better.

One of our core values at F8 Consulting is to serve as a technology resource for our community, especially the nonprofit and educational organizations that serve it. We are committed to helping these organizations use technology to enable their employees to focus on tasks more closely aligned to their philanthropic, charitable and educational goals. Developing efficient network architectures and taking full advantage of discounts available only to nonprofits enables us to work within the tightest budgets.

SERVER DONATION PROGRAM

Think you can't afford a new server? Think again.

F8 Consulting will donate a new server to your organization when you sign a one-year agreement for Managed Services or other select service contracts.

Contact us for more details.

F8 Consulting is proud to offer the following discounts to tax-exempt organizations:

- F8 Consulting Server Donation Program
- Hardware discounts
- Software discounts
- Discounted rates for labor on select service contracts

Ready to take your technology to the next level?

Contact F8 Consulting to discuss discounts available only to nonprofits.

F8 Online Backup Service for Businesses
Serious data protection for multi-user environments

With F8, it's more affordable than you think!

Secure

- ✓ **Encryption**
  - ▪ **Blowfish:** At the beginning of the backup process, all files are locally encrypted with 448-bit Blowfish encryption.
  - ▪ **AES:** F8 Online Backup Service users have the option of supplying a personal key utilizing military-grade 256-bit AES encryption en lieu of 448-bit Blowfish encryption.
  - ▪ **SSL:** These encrypted files are then sent via 128-bit SSL—the same encryption used in online banking— to a data center where they remain in their encrypted state.
- ✓ **Data Centers.** Our servers are located in several EMC-managed data centers across the globe. Each data center adheres to the highest standards of security for optimal data protection. Our data centers are SAS 70 certified and offer a combination of the following state-of-the art security features:
  - ▪ Waterless fire suppression systems
  - ▪ Redundant power distribution units
  - ▪ Redundant diesel generators
  - ▪ Seismic safeguards, bracing and slider bearings
- ✓ **Near Continuous Data Protection:** F8 Online Backup automatically detects and backs up new and changed files.
- ✓ **Alerts:** Administrators may create customized email alerts regarding the backup health of their account to be sent to their email address on a daily, weekly, or, monthly basis.

Simple

- ✓ **Automatic or scheduled backups:** You decide when we perform your backups. Automatic is the simplest method and backups are performed while your computer is not in use. Scheduled backups can be performed daily or weekly at your specified time of day.
- ✓ **Block-level incremental backups:** After the initial backup, F8 only backs up new or changed portions of files, which saves bandwidth and ensures future backups are lightning fast.
- ✓ **Bandwidth throttling:** Users can determine how much bandwidth they want to dedicate to their backups so other high-priority services can run unimpeded.
- ✓ **Multiple restore options:** Users and administrators can restore data via our software client, through the web, or by ordering a DVD restore. Windows users can also restore data via right-click or through your personal Virtual Drive.

Support

- ✓ **Version (snapshot) support:** Restore file versions up to 30 days in the past.
- ✓ **SQL, Exchange, and network drive support:** Our online backup service backs up common business applications running on Windows servers.
- ✓ **Windows and Mac support**: We support Windows (2000, XP, 2003, and Vista, including servers) and Mac OS X (10.4 and 10.5, desktop and server) operating systems.
- ✓ **Open and locked file support**: F8 Online Backup backs up all open and locked files, including Outlook PST files.

If you would like more information about incorporating the F8 Online Backup Service into your network, feel free to contact us at any time. One of our experienced team members will respond to your request with the answers you're looking for. You can either give us a call at (201) 839-5410 or email us at info@f8consulting.com. Either way, we'll provide you with quick, courteous service.
